Hello

My name is Fady I am a computer science student in asyut university. I have a good experience in data manipulation and data analysis using Microsoft Excel and Python using NumPy, Pandas and Matplotlib Libraries.

Your project has caught my eyes. I have done similar projects like this before. I've attached my previous projects below for you to have a look.

- I will need to clear any duplicates or any values.
- Implement some pre-defined functions which will help you plot some graphs

I will be paid 5$ per hour and will work for 8 hours a day which means this project will take a week from me. I am excited to make this cleanup for you.

I look forward to work with other.
